RESORTE ARCO

Este tipo de resorte se produce en rollos y se corta a la medida que se necesite, se sujetan a los rieles delanteros y traseros de las sillas o sillones y, cuando se unen, son capaces de soportar el peso

RESORTE ESPIRAL

que se encuentran en muebles antiguos, pero también en mobiliario moderno de alta gama; su calibre varía dependiendo de la altura del asiento, su vida útil es muy larga, siempre y cuando se respeten las recomendaciones de uso y límite de peso.

CUENDA

CORREA ELÁSTICA

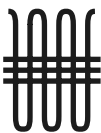

La banda elástica es una pieza integral de cualquier sillón. No solo le da al sillón la estructura y el soporte necesarios, sino que también se asegura de que se mantenga cómodo y en su lugar.

CUENDA

Contamos con diversos grosores de cuendas, los cuales se adaptarán a tus necesidades.

*CONTAMOS CON HULES DE DIVERSAS DENSIDADES,
CONSULTA CON NOSOTROS SOBRE LA QUE MÁS TE
PUEDA CONVENIR.*

HULE ESPUMA

Su uso se extiende al área de tapicería,
diferentes tejidos, tapizados de muebles,
calzado, colchones, packaging, entre
otros usos.

AGLUTINADO

El aglutinado como en las espumas existen varias densidades y durezas. Este es utilizado como soporte de colchones, asientos para sala y sillas, al ser un material tan versátil, en combinación con otras espumas, este nos ofrece confort, soporte y larga duración.

PERFILADO

Éste material es utilizado en colchones como relleno principal o integrante de los acolchonados. También en la construcción de sillas y muebles, es útil para acolchonar. Este material también es utilizado como aislante térmico y acústico.

*DELCRON
EN GREÑA*

Por su naturaleza, suave y voluminosa, se utiliza como relleno para cojines decorativos y almohadones de salas y sillones.
